# Abdul Haseeb Khan

React Native

A dedicated and motivated computer science graduate with experience in software engineering and development. Currently, in search of opportunities in the areas of mobile app development, but not restricted to it, as I am inclined towards exploring new domains. I will try my best to be a fruitful member of the institution and present my skills as a software engineer.

## EDUCATION

### University - BSCS
National University Of Computer and Emerging Sciences -FAST

*09/2018 - 12/2022*

### Collage - Engineering
Shah Abdul Latif College

*2014 - 2018*

## EXPERIENCE

### HashPotato
React Native Developer

*07/2021 - 11/2021*

*Achievements/Tasks*

- Created a dual nature app as per the requirement with responsive front-end.
- API Integration Using Axios & Fetch.
- Interacted the Project Owner directly.

### FYP
DriveKaro ( Mobile App )

*03/2022 - 12/2022*

*Achievements/Tasks*

- Created multi-role-based app using React Native.
- The aim of the App was to digitalize driving schools and an opportunity for individuals to offer courses or enroll in the best course.
- Features implemented like logs ( map ), schedule, courses market, course creation, notification, chat, and some common more features.
- Stack & Libraries: React Native, Navigations, JSX, Pusher, Firebase/storage, Google Map API, Context API, Geolocation, Async-storage

### Fiverr
Mobile App

*Achievements/Tasks*

- Interacted directly with customers during development to update order requirements, give feedback on testing procedures, and ensure the final product met operational targets.
- Partially Developed Mobile Applications using React Native with response pixel-perfect UI.
- Successfully created applications like Music App, Lottery App & simple Bank App.

## SKILLS

React Native   React JS   JavaScript   NodeJS

Hooks & Redux   Python   CSS3   HTML5

Data Structures   C/C++ Language   SQL   MySQL

Figma   AdobeXD   VS Code   Express   Git

Pusher   Firebase

## ACADEMIC PROJECTS IN REACT NAITVE

Design and Analysis of Algorithms Project
- Semester Project of Design and Analysis of Algorithms.
- Created Mobile app which calculate the result on run time.
- Implement 10 algorithms of Design and Analysis of Algorithms.

Hotel Management ( Front End + Back End )
- Provided the app based solution to all local and international Client for online Room Booking.
- Features: Hotel/Room Booking, Room sharing, Dual verification, Admin Dashboard.
- Worked on React Native, PostgreSQL using Node JS.

Food App ( Front End Only )
- Created multi-role-based app using React Native.
- Features: Placing Order, add Item, maps, cart, and all other necessary features.
- Stack, Bottom Tab, Drawer Navigator are used,Used Hooks and Redux

ToDo App( Front End & Back End )
- Simple App with all CRUD operations
- Stack: React Native, Node JS, Express JS, & Mongo DB

## CERTIFICATES

Programming for Everybody (Getting Started with Python)

Business Metrics for Data-Driven Companies Completed

## SOFT SKILLS

Logical & Critical Thinking   Collaboration & Teamwork

Problem Solving Decision Making   Attention to Detail

Time Management
